

Amendments to the Abstract:

Please replace the Abstract of the Disclosure section of the specification with the following replacement section. The replacement section is submitted with markings to show all changes relative to the previous version, which was located on the cover page, preceding page 1, of the above-referenced patent application as filed. A clean copy, shown without markings and any additional text, is provided following page 17 of this paper.

ABSTRACT OF THE DISCLOSURE

A cutting head for brush cutter, edge trimmer or similar includes ~~comprises~~ a passageway (112) for a cutting string (300) and at least one fillet (120) to support the string extending between ~~[[s]]~~ a string outlet region of the ~~said~~ passageway and a peripheral region of the head. ~~According to the invention, the~~ A surface of the fillet presents a recessed profile (120a, 120b) which is substantially complementary to a part of the cross-section of the cutting string (300), in order to guide the cutting string in ~~this~~ the recess when the string flexes in a direction opposite to the rotation of the head to rest against the fillet. ~~Thus, the~~ The trajectory of the string can be stabilized and its fatigue limited when there are successive impacts against the fillet.
